Dear Nova1625 Team,

I am a Computer Science student at the University of Nevada, Las Vegas applying for the part-time/internship Web Developer role. I am seeking hands-on experience contributing to real-world projects while continuing to grow in a professional development environment.

I have formal work experience as a Web Developer and IT Technician, building and maintaining web applications using **HTML**, **CSS**, **JavaScript**, and **PHP**. My work has included front-end development, responsive UI improvements, third-party API integrations, and collaboration through **Git**-based workflows. I am comfortable shipping features, fixing bugs, and communicating clearly with both technical teams and clients.

Alongside my professional experience, I actively build personal projects using tools such as **C++**, **Next.js**, **Rust**, and self-hosted infrastructure. I value clean code, thoughtful UI/UX, and continuous learning.

I am ecstatic about the opportunity to contribute to your team and grow as a developer while supporting meaningful projects. Thank you for your time and consideration.

Best regards,

Gael Zarco
